The ALS Association Applauds Amylyx's AMX0035 Announcement, Following Amylyx's announcement that it intends to submit a New Drug Application (NDA) for AMX0035, The ALS Association continues urgently working to keep the momentum of progress that has been made in the fight against ALS. AMX0035, if approved, could be the first drug ever to treat the underlying cause of ALS, rather than just the symptoms. Following Amylyx's announcement, The ALS Association immediately called on the U.S. Food and Drug Administration to approve the treatment for all people with ALS.

The association also called on the research community—accountable to people living with ALS and their families—to continue to work together to translate ALS research into meaningful and life-changing solutions. The new drug application is a big step forward for the ALS community, and we will continue to work with the FDA, and the research community to support the quick approval of AMX0035.

#StrikeOutALS fundraising efforts, as well as Shirley, who is living with ALS and was in for a very special power wheelchair that will enhance her mobility and independence as she lives with ALS.

We also want to thank our friends at Carrier, joined by Twins legend Kent Hrbek, for supporting our Walk Awards show recognizing some of this year's most creative, engaged, and impactful young adult and family caregivers in the Twin Cities.

The ALS Association has its own online calendar to also help coordinate your household tasks. Did you know that The ALS Association has its own online calendar to also help coordinate your household tasks? You can visit our website to learn more about this tool and its features.

Family Assistance Program has now reopened to both indoor and outdoor requests for assistance. The requests for assistance vary by task, frequency, and length and you can choose what works best based on your interests and availability. The Family Assistance Program volunteers to take care of a variety of tasks. Visit our website to learn more about this tool and its features.

ALS Association to CMS: We Urge You to Listen to People Living with ALS

October 15 to December 7 is the time when all Medicare beneficiaries are eligible to enroll in Medicare Part D prescription drug plans and Medicare Advantage plans. Part D is Optional. However, Medicare beneficiaries who do not sign up for Part D when eligible may face a penalty, known as a Late Enrollment Penalty, of anywhere from 1% to 3% per month for the number of months the beneficiary was eligible but did not enroll, and a Late Switch Penalty of anywhere from 1% to 3% per month for the number of months the beneficiary was enrolled but switched plans.

Medicare cost control approaches don't work well. ALS do not improve, and the intensity of their service will increase with time. Medicare cost control approaches don't work well. ALS do not improve, and the intensity of their service will increase with time. CMS must listen to the people living with ALS and put resources into our ALS registry so people living with ALS can participate in the ALS registry and see their data on their Medicare claims.

The National ALS Registry and Biorepository was presented our executive director, Jennifer Hjelle, with a generous $10,000 donation in support of this year's #StrikeOutALS fundraising efforts.
